Subject: Colpitts Lake

Hello, I am wondering if your membership is aware that there is a proposal from the Armoyan group before the Chebucto Community Council to request rezoning of lands around Colpitts Lake (between Purcells Cove Road and Herring Cove Road) for the purpose of allowing a large subdivision.

It appears that an integral part of this proposal would be the construction of a monstrosity known as the Mainland South Ring road proposed in the Go Plan (presently being reviewed by H.R.M. planning staff). This road is envisioned as piercing the area known as the Purcells Cove wildlands in two places including one arm to go right between Williams and Colpitts Lake. Needless to say this is inconsistent with the use of these lands envisioned by the recently adopted Parklands Strategy of HRM. It would have the effect of ruining and opening up to development one of the last great wild areas close to downtown Halifax. There is a public meeting at 700pm on March 2nd at the former county building 2750 Dutch Village Road to voice concerns. I am sure any voices of opposition will help to defeat this proposal. The advertisement for this meeting can be found in Feb 14th Chronicle Herald. I can be reached at 422-2894
