Subject: obtain a report

Hello, my name is Serena and I work in Sudbury, ON with the Nickel District Conservation Authority.

I would like to obtain a copy of the following report because I cannot obtain a copy from the libraries in Nova Scotia because the report is not available online.

Would it be possible to obtain a copy of the report by Monic Gaertber?

Gaertner, Monica J. 1999. Benthic Macroinvertebrate Diversity and Biotic Indices for Monitoring of Lakes Dollar, Russell, Stillwater, Papermill and Kinsac within the Halifax Regional Municipality (HRM), Nova Scotia, Canada. Project E-2, Soil & Water Conservation Society of Metro Halifax. (includes an educational video). xiv, 6 Sections, Appendices A-I.

My interest in this report is due to a macroinvertebrate study that I am involved in within the City of Greater Sudbury that will study macroinvertebrates in several lakes within the city.

Also, if you know of any reports or studies that contain sampling protocols relating to lake sampling, would be greatly appreciated (if online then just the link is great!) We have protocols for lake sampling but more could always be useful.

Thanks,

Serena Boivin-Whalen
