Subject: Bioassessment

I recently discovered your webpage "Freshwater Benthic Ecology and Aquatic Entomology Homepage". I was very impressed, the best source of information on this topic I've seen. My only complaint with web pages with this much information is that it is difficult to download large documents such as your paper titled "Bioassessment of Freshwater Using Benthic Macroinvertebrates- A Primer". Therefore I was wondering how to get a hard copy of this paper.

Again, excellent web site.
