Subject: Springfield Lake, Middle Sackville

Hi Mr. Mandaville,

I am a resident of Middle Sackville and live on Springfield Lake. I read the article in the Daily News with great interest. I am extremely concerned about the condition of our lake. I was searching through the Watershed Advisory Board website for more info on Springfield Lake such as

what pollutants/contaminants have been found in the lake. There is a lot of information there and I was wondering if you could direct me to the websites with the reports/info I'm looking for. Of course, the other issue

is how best to deal with the contamination and what in particular can residents do to help stop the pollution - ie don't use fertilizer, don't wash your car in the driveway, etc. If you could direct me to that kind of

list as well, it would be most appreciated. At least we can get a start on

saving this lake.

Kindest Regards,
Julie Freeman
