Subject: tolerance values

Hello,

I've been reading your report "Benthic Macroinvertebrates in Freshwaters- Taxa Tolerance Values, Metrics, and Protocols." I would like to use your tolerance values listed in Appendix A for comparison with other tolerance values. It would greatly aid my effort if you could possibly send me a file with the tolerance data in it that is in a manipulable database format (such as .xls, .sas, .mdb, etc.). That is, if you have it. Also, I was wondering if your Appendix includes all the values reported in Hauer and Lamberti, 1996 and Bode et al., 1996? Your report is very informative and smooth to read. I appreciate your help.

Thank you, in advance,

Lori Winters
